

107 年度 國外教授來訪學術演講「Investigation on Wind Force Characteristics of Building Structures under Non-stationary Wind Flow」 演講

時間：2018-09-21

地點：工館 E801A

Dr. Matthew S. Mason is currently a Lecturer in the School of Civil Engineering at University of Queensland in Australia. He is also a visiting research fellow funded by Joint Research Program of Emerging Scholars of Wind Engineering Research Center at Tamkang University.

He has several frequently-cited publications in wind engineering field and rich experience in working with design consulting groups for structural analysis of various structures. Recently, he reaches his branches to non-stationary wind loads and has developed many wind tunnel technologies for flow simulations
